# Health Corner

## Daily Exercise continued

**Daily exercise not only promotes physical health;  
it also aids in reducing stress.**

### Here's how:

- A single bout of exercise can be a valuable short-term therapy for reducing tension, depression, anger, and confusion.
- A ten-minute brisk walk will yield one hour of increased energy and reduced tension, whereas a sugary snack can result in fatigue and tension.
- Moderate-intensity exercise is more beneficial than high-intensity exercise for anxiety reduction.
- Regular exercise increases the ability to handle stress by lowering stress hormones.

Hi Friends,

Trouble is often greater in anticipation than in reality; but this is not true of the time of trouble described in the Bible.

God's Word warns us that "...there shall be a time of trouble, such as never was since there was a nation, *even* to that time" (Daniel 12:1).

What will life be like for the LORD's faithful people in that most trying hour?
