HEALTH CORNER

EXTERNAL USES OF WATER

Water treatments can be used to restore health.

“There are many ways in which water can be applied to relieve pain and check disease. All should become intelligent in its use in simple home treatments.”

- Ministry of Healing, page 237

Hot Foot Bath

The hot foot bath consists of placing the feet in hot water deep enough to completely cover the ankles. It may be used alone or combined with another treatment such as the heating compress. This treatment can be used for a variety of ailments, from headaches to stomach aches.

The hot foot bath affects the circulation of the entire body. Heat expands or dilates the blood vessels of the feet, which moves the blood from other body parts to the feet. The increased blood flow to the feet relieves congestion of the blood in the brain, lungs, and abdominal organs.

Treatment Precautions

- Use only mild heat in diabetics and others with loss of feeling (numbness) or decreased blood flow to the legs and feet.

- God's Healing Way

If you would like more information on the complete treatment procedure, please feel free to email info@designedtothrive.ca.
